

Solid Cone Spray Nozzle (Injector Type)

Full cone nozzle form complete spray coverage in a round or square shaped area. It provides an uniform spray distribution of medium to large size drops resulting from their vane design which features large flow passage and control characteristics. This is extensively used style in industry

Characteristics	: A high efficiency and economical performance is obtained.
Design	: One piece construction.
Application	: For high pressure cleaning systems, jet cutting and separating.
Flow rate	: 5 LPM to 250 LPM
Pressure	: 2.0 Kg/cm ² or specified
Spray angle	: Only 0°
End connection	: 1/8" to 1 " BSP/BSPT/NPT
M.O.C.	: S.S. 316, 304, Brass, PVC, PVCF, PP, Teflon

G	L1	L2	HEX
1/8	18	8	12 mm
1/4	22	10	14 mm
3/8	25	10.5	17 mm
1/2	32	13	22 mm
3/4	42	16	27 mm
1	56	18	36 mm
